

Niagara Swing Screen Door

The Niagara swing door features two 1 1/4" push bars and an extremely rugged extruded aluminum (2 3/8" x 3/4" x .050" walls) frame. Aluminum spur corners locks give the door added durability and stability, which are free from rust assuring years of trouble-free service.

The outside lower section is protected by an included matching (anodized or powder coated) grille and 12" kick plate which minimizes screen tear-out or push through by pets, children or just everyday use. In addition, it adds rigidity and durability.

Hinges with Oilite bushings are attached to the side adjust expander with heavy duty aircraft quality rivets for smooth opening and long life.

Available Sizes: 30", 32", and 36" widths

The Niagara includes a bottom expander channel to allow semi-custom adjustments up to 1.5" high and allow adjustment for door frames that may be out of square.

Available colors:

Dark Bronze or Clear Anodized, or White Powder Coated painted finish

Includes All Hardware:

- Heavy-duty adjustable pneumatic closer
- Push button handles and metal door keeper
- Hinges with Oilite bushings attached to expander
- Bottom adjust with vinyl sweep to help keep out insects

Choice of Finishes:

- Anodizing: A hard durable corrosion resistant finish protective surface that enhances the appearance of the extruded aluminum surface.
- Powder coated is a much superior surface when compared to "wet paint", and it is an environmentally friendly process.

Everglade Sliding Screen Door

The Everglade is an aluminum sliding screen door incorporating the highest quality workmanship and parts. Featuring a 1 7/8" x 1/2" x .050" extruded aluminum frame that is designed to last with superior durability. Aluminum spur corner locks are rust free assuring strength and stability. Easy-grip aluminum handles, includes an inside locking latch, adding to its good looks and facilitates easy opening and closing.

The 1" stainless steel rollers and adjustable screws are designed for years of maintenance free service. Top guides help prevent rattling and provide improved gliding ease. They are resistant to corrosion induced wear typical in salt and humid air environments.

Assembled Door includes: Fiber wire screen and serrated vinyl spline to hold the screen securely in the frame channel for a positive tight fit.

Available Sizes:

30", 36", 48", 60" widths and 80" or 96" heights

Available Colors:

Dark Bronze or Clear Anodized, or White Powder Coated painted finish

Choice of Finishes:

- Anodizing: A hard and durable corrosion resistant finish protective surface that enhances the appearance of the extruded aluminum surface.
- Powder Coated paint is a much superior surface when compared to 'wet paint', and it is an environmentally friendly process.

Mojave Sliding Screen Door

The Mojave is our strongest aluminum sliding door. Featuring an extra heavy-duty 2 3/8" x 1/2" x .062" extruded aluminum "Hat Section" frame that is designed to last, even under constant usage. Solid extra heavy-duty extruded aluminum spur corner locks hold like a weld assuring long lasting strength and stability.

Salt water air exposure and other outdoor elements are never a problem with the Mojave door due to its standard stainless steel 1 1/4" ball bearing roller and housings. Top glides help prevent rattles providing easy sliding, both are resistant to rust and corrosion.

Assembled door includes: Fiber wire screen and serrated vinyl spline to hold the screen securely in the frame channel for a positive tight fit.

Available Sizes:

30", 36", 48", 60" widths and 80" or 96" heights

Available colors:

Atlas Swing Security Screen Door

The Atlas swing screen door is an ultra high performance and superior strength swing screen security door. One of the industry's premier doors featuring an extremely rugged high tensile strength extruded aluminum (3" x 1" x .062" walls) frame combined with heavy duty extruded aluminum spur corner locks utilizing four screws per corner for added strength give the door more durability and stability, which are free from rust assuring years of trouble-free service.

The screen is protected by a full extra thick (.297") Amplimesh grille. Hinges with Oilite bushings are attached to the side adjust expander with heavy duty aircraft quality rivets for smooth opening and long life. The door provides the ultimate in toughness and security with the included extra strong black powder coated brass handle with inside thumb turn and outside key lock. The locking mechanism has a double deadbolt for maximum security.

Available Sizes: 30", 32", and 36" widths

The Atlas includes a bottom expander channel to allow semi-custom adjustments up to 1.5" high and allow adjustment for door frames that may be out of square.

Available colors:

Dark Bronze Anodized or White Powder Coated painted finish

Includes All Hardware:

- Solid brass, black powder coated deadbolt handle with thumb turn and key lock
- Heavy-duty pneumatic closing mechanism blends strength and operational ease
- Hinges with Oilite bushings attached to expander
- Bottom adjust with vinyl sweep to help keep out insects
- Non removable hinge pins

Choice of Finishes:

- Anodizing: A hard and durable corrosion resistant finish protective surface that enhances the appearance of the extruded aluminum surface.
- Powder Coated is a much superior surface when compared to "wet paint", and it is an environmentally friendly process.
